

MORE THAN RECOVERY. MORE THAN A GYM

Founded in 2018 by former IndyCar driver Sam Schmidt, who sustained a spinal cord injury in 2000, DRIVEN Neuro Las Vegas exists to enhance and extend the benefits from traditional care pathways and support continued progress and independence long after insurance-based rehabilitation ends.

Today, we're more than a NeuroRecovery Center. We're a community built around recovery.

People come here to improve strength, mobility, and independence, but they stay because they find encouragement, connection, and people who understand their journey.

Every workout, every milestone, and every relationship reinforces one simple belief:

Recovery is stronger when it's backed by community.

WATCH RECOVERY IN ACTION

"I WANTED MORE EXERCISE, I WANTED MORE MOVEMENT IN MY BODY. IF I DIDN'T GO TO DRIVEN, I DON'T KNOW WHERE I WOULD BE RIGHT NOW."

MELVIN DOCTORO

RECOVERY DOESN'T END WHEN TRADITIONAL CARE DOES.

RECOVERY IS A LIFELONG JOURNEY.

DRIVEN Neuro Las Vegas is part of DRIVEN Neuro, a nonprofit organization dedicated to helping people living with spinal cord injuries and other neurological conditions continue moving forward.

As our Southern Nevada NeuroRecovery Center, we provide activity-based training, adaptive fitness, and holistic wellness programs designed to extend recovery long after traditional rehabilitation ends.

Whether you're recovering from a spinal cord injury, stroke, brain injury, or another neurological condition, our team is here to help you continue moving forward at every stage of your recovery journey.

WHY ACTIVITY-BASED TRAINING?

Activity-Based Training (ABT) is an evidence-based approach that uses repetitive, task-specific movement to activate the nervous system and promote continued recovery after neurological injury or disease.

Unlike traditional rehabilitation, ABT is designed to help individuals continue progressing long after insurance-based therapy ends.

ACTIVITY-BASED TRAINING HELPS SUPPORT:

- STRENGTH
- FUNCTIONAL RECOVERY
- MOBILITY
- INDEPENDENCE

Featuring state-of-the-art recovery technology including AlterG®, G-EO®, LiteGait®, Functional Electrical Stimulation (FES), XCite®, and more.

PROGRAMS DESIGNED AROUND YOU

WELLNESS MEMBERSHIP

Accessible fitness, adaptive exercise, wellness programming, group classes, and a welcoming community that supports long-term health and recovery.
